JET-FTIR SPECTROSCOPY OF BIOMOLECULAR MODEL SYSTEMS

Cuvillier Verlag Okt 2007, 2007. Taschenbuch. Book Condition: Neu. 210x147x12 mm. Neuware - Bridging the gaps between biology, chemistry and physics, biophysical chemistry studies the microscopic interactions that determine the macroscopic processes in all living organisms. Typical biomolecules such as proteins are complex, flexible macromolecules. They often occur in specific conformations among the vast number of possibilities and conformation has a strong influence on their function. Specific molecular interaction is the key to biomolecular function. Molecular recognition phenomena, therefore, are...

Reviews

This written publication is wonderful. It can be written in straightforward phrases instead of confusing. I discovered this pdf from my dad and i suggested this publication to learn.

-- **Jesse Tremblay**

Without doubt, this is the best operate by any publisher. I was able to comprehend everything out of this written e publication. Its been developed in an remarkably easy way which is only following i finished reading through this ebook by which basically altered me, modify the way i believe.
