As a general thing, American engineers are not educated for their business; and when they do possess a knowledge of pure science, they are at a loss how to apply it. The reader is presumed acquainted with the elements of arithmetic, geometry, algebra, and mechanics; being thus provided, he will, by a perusal of what follows, be enabled to correctly proportion bridges, of wood, stone, and iron; abutments, piers, retaining walls, superstructure, and locomotive engines; and to plan and lay out, execute, and estimate any description of work occurring upon railroad.
