

No Wonder You Wonder!: Great Inventions and Scientific Mysteries: 2016

By Claude R. Phipps, Friedel Wicke

Springer International Publishing AG. Paperback. Book Condition: new. BRAND NEW, No Wonder You Wonder!: Great Inventions and Scientific Mysteries: 2016, Claude R. Phipps, Friedel Wicke, This book explores and explains scientific mysteries and principles, leavened with tongue-in-cheek humor and an abundance of illustrations. Chapters are short, but give an understanding of technology and science not available elsewhere. Questions include: * What holds a satellite up while it goes around the Earth? * Why is the sky (made out of clear air!) blue instead of green, or just black as night like the sky that high altitude jumper Felix Baumgartner saw? * How is laser light different from "normal" light? * Did Columbus really discover that the Earth is round? * Which one invention will assuredly survive our civilization? * Why can't you travel back in time? If you often feel embarrassed because you don't have a clue about lasers, the difference between volts, amps and watts, or how jet planes really work - but you would like to understand the physical principles of our modern world, whether you're a teen or a parent - this book is for you! To understand the basics of quantum mechanics, or of protons, neutrons...

Reviews

Extensive information! Its this sort of great read through. It is amongst the most incredible book i have go through. I realized this publication from my i and dad suggested this book to understand.

-- Prof. Devon Bernhard PhD

The publication is simple in go through preferable to fully grasp. I am quite late in start reading this one, but better then never. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- Mrs. Josiane Collins
