Createspace, United States, 2011. Paperback. Book Condition: New. 200 x 128 mm. Language: English . Brand New Book ***** Print on Demand *****.The current landscape of health and nutrition literature is a maze of conflicting advice, contradicting ideas, and flawed premises. How can milk be bad, if we re mammals, and milk is sufficiently nutritious to feed us through the period of our lives when good nutrition is most critical? Other authorities will insist that the only way to be healthy is to eat a more or less flavorless diet. How can a healthy diet be so unpleasant to the senses-in other words, why would our noses and tongues make unhealthy food seem appealing, and healthy food bland and undesirable? Does it really make sense that your body is built to lead you to the wrong...
