Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from New Analytic Geometry The chapters devoted to the study of the conic sections (Chapters X and XI) are brief but contain all essential characteristics of these important curves. The examples are numerous, and many are given without answers in case any useful purpose is served by so doing. The book, like the authors Elements of Analytic Geometry, is essentially a drill book; but at the same time all difficulties are not smoothed out, though the student is aided in making his own way. He is taught to formulate rules descriptive of methods, and to summarize the main results. The appearance in the text of various Rules is designed expressly to encourage the student in the habit of formulating precise statements and of making clear to himself each new acquisition. Acknowledgments are due to Dr. George P. Gundelfinger, of the department of mathematics of the Sheffield Scientific School, for many of the problems in the analytic geometry of space and for many valuable suggestions.
